

AG Pool Pros LLC Pre-installation Checklist

- Is your pool delivered? _____ Pool delivery date _____
Put the pool pallet in your garage if possible, if outside you should put a tarp over the package.
- Select a location for your pool. Please paint out your pool by finding the center, mark it with a "C". Use the radius from the center to walk in a circle and paint out your pool. (We use a 100' measuring tape and a screwdriver.) Keep in mind that we will be digging 2' beyond the pool location. Now think about where you want the pump and filter to go, mark this location with an "P". Even small digs can yield a large pile of dirt. We can place this pile within 15ft of the dig site. Mark where you want the dirt pile with a "D". Grading more than 6" will incur a \$25.00 per inch fee, payable with cash or check.
- Do you have a permit (if needed) _____ •
Do you have an OUPS ticket number? _____ Call OUPS **811**. Pull an OUPS ticket number as the **Home Owner, we will renew that ticket number closer to the install as the contractor.**
- Do you have a 6' clearance to your pool site? _____
Even preexisting/replacement pools need 6' to the pool site. We do not remove fences, and we do not go through neighboring yards.
- All electrical to the pool should be installed after the pool installation as we do not want it to get in the way of the install. We will need outside power within 100' of the pump location.
- Do you need water delivered? _____ If so you are responsible for contacting a local water delivery company. You will also need a water hose that can reach your pool site. Water companies cannot always be there when we are to the point of adding water in which case we will need to set your liner with a hose.
